

2024

Declaration of Performance

Reminder

Each declaration of performance must be completed and approved one week before the vehicles first participation. A one-week deadline before an event also applies for approval by the series if modifications are done to the vehicle which impacts its original declaration of performance. A dyno sheet must be provided to support the information included in the declaration of performance. The Dynamometer correction must be set by as per SAE J1349 norm and the technician must indicate the maximum wheel horsepower and torque at the wheels, with rpm and boost pressure for forced induction vehicles. Please be reminded if there are any concerns with your declaration and dyno sheet provided, the SPC can request a new test do be completed at your expense on a dynamometer of its choice. Wheel size declared must remain the same for the entire season. This cannot be changed unless approved by the series technical official. The crew chief will be the person responsible for questions related to the declaration of performance and will be the main contact for the tecnical official of the SPC. The crew chieft can be the driver.

Crew Chief Name			
Crew Chief Phone #			
Crew Chief Email			
Car #			
Car Year			
Manufacturer			
Model			
Engine Code			
Cylinders			
Wheel Size			
Engine Rev Limit			
Max Turbo Pressure in PSI			
Max Wheel Horsepower			
	@ RPM		
Max Wheel Torque			
	@ RPM		
Vehicle Category	SP:	P:	C:
Minimum Weight			

This completed form will be sent by email to info@superproductionchallenge.com before the first event.
